

Actimel character copy

Look who's grown up: your Acti-Heroes are back with a bang and more than ready to take on new, tougher challenges with their developed skills and devoted team spirit.

One thing's for sure, the Acti-Heroes' experience and boosted capabilities are certainly going to come in handy: the team's beloved home, Planet Actimel, is surrounded by a powerful blue liquid called the Blue Ultra-Element. But the crafty Malaktic is on the move, sucking away this much-needed living force and getting stronger by the day. With the help of Team Malaktic, a wily-yet-clumsy band of cosmic monsters, his ultimate plan is to drain away the Blue Ultra-Element entirely.

And Team Actimel won't stand for that!

So come on in to see how the team is planning to foil Malaktic's cunning plan with their epic collection of skills and gadgets: there's a nimble boomerang, cosmic GPS and even an energy-disc-launching bracelet. Get involved with games, downloads and activities inspired by Actimel for Kids, and prove you're fit and healthy enough to qualify for Team Actimel.

AC: Strategic Mastermind

"I'm AC and I've got the team's back!"

AC's job as the Acti-Heroes' planning pro has got them out of some pretty tight spots, so he's definitely winning at leadership. Always alert and great at thinking on his feet, AC's accessories include a multi-functional boomerang and futuristic portable jet. When they're not busy averting intergalactic disaster, AC and TI love nothing more than playing practical jokes on MEL.

TI: Mr Muscle

"I'm TI and I can move mountains!"

TI's muscles are even bigger now, if you can believe that. His daily workouts have grown with him, and he's known throughout the galaxy for his legendary, inter-planetary power. With a fearsome capture trap and a space-enabled GPS, he's got the whole package. And if there's a party taking place anywhere within a few light years, you can bet TI will be at the centre of it!

MEL: Elastic Fantastic

"I'm MEL and I'm quick smart!"

In the girls' corner, MEL is so quick that you might just miss her. With her elastic movement and crackerjack tactics, she's known for outclassing Team Actimel's opponents with just a flick of her wrist. Taking accessorising to the next level, MEL's rings and bracelets have the ability to launch invincible energy charges and discs in the blink of an eye. AC and TI like to think they protect MEL but really, she's got it all covered.
